RESPONSIBILITY: Trustees, Director and Staff

## **Environmental Policy**

The Kirkland Town Library is committed to contributing towards the conservation of our natural resources and the protection of our environment, as both are key assets to our community, now and for future generations.

Toward that effort, the library will incorporate environmental considerations within our decision-making. We will implement practices within our operations and facility to promote sustainability of our environment.

Staff and volunteers of the Kirkland Town Library, as well as community members, are encouraged to be actively involved in the Library's efforts.
